Course Description

A growing movement in Disability Studies, disability rights, self advocacy by persons with disabilities and parent advocacy for their children with disabilities in education is contributing to broad and significant developments in the law impacting the training and practices of attorneys and educators.

This combined course is open to law students and doctoral level education students. It is anticipated that law students as well as College of Education students in the Ed. Leadership, Special Education, School Psychology, Counseling Psychology and Human Services programs will benefit from the curriculum.

Students in this course will come together in a pre-practice environment to receive training in the nuances of disability law, including gaining an understanding of the historical and social shifts in the construction of disability and gaining a broad understanding of the types of barriers to access and the nondiscrimination laws that impact the lives of persons with disabilities across the lifespan. Topics will include K-12 and higher education, transition to work, employment discrimination, independent living, and fair housing, access to government programs and services, and mediation.
This course provides students with knowledge of current case law and legislation, sensitivity to legal issues, and application of legal principles related to disability law. Guest speakers will come throughout the semester to present on various topics.

There are no prerequisites, and there will be a final examination.

Required Readings

• Supplement: This case book includes a supplement with statutes and regulations.
• Additional readings available online.

Recommended Readings

It is highly recommended that students brief the assigned cases. Briefing will help you read the cases more effectively and be better prepared in class to discuss and present them. To learn about the practice of briefing cases and how to brief a case, students will want to read:

• Ten Instructions for Briefing Cases, by Prof. Glesner Fine. Online at: http://www.law.umkc.edu/faculty/profiles/glesnerfines/bateman.htm

Documented Disability

Appropriate accommodations will be provided for students with documented disabilities. If you have a documented disability and require accommodation, arrange to meet with the course instructor within the first two weeks of the term. The documentation of your disability must come in writing from the Disability Services in the Office of Academic Advising and Student Services. Disabilities may include (but are not limited to) neurological impairment, orthopedic impairment, traumatic brain injury, visual impairment, chronic medical conditions, emotional/psychological disabilities, hearing impairment, and learning disabilities. For more information on Disability Services, please see http://ds.uoregon.edu/.

Grading

The grade for this course is based on the final examination and accumulated points for the participation exercises -- in the form of emailing the instructor responses to questions posed in class.
Final Exam

Eighty percent (80%) of your grade for this course will be based on the final exam. It will be graded anonymously. The exam will be a four-hour open-book open-note exam with short questions and essay answers. Your answers must be word processed in MS-Word or text format. Handwritten answers will not be accepted. You will have the option of doing your exam at the law school or at home.

While I am allowing four hours for the exam, this is a universal design feature and I anticipate that students will be able to complete the exam in about two hours.

Participation Points

The participation points will constitute 20% of your grade. The purpose of the participation exercise is to encourage you to come to class and to discuss topics with your classmates. How it works is that 1) a question will be given each class (for a total of 14 questions), 2) you must email your response to me at hvr@uoregon.edu by Noon of the following week (the deadline), 3) to receive full credit, you must email a response to 10 of the questions by the deadline. That means that you can skip any 4 of the questions. Responses received after the Noon deadline will be worth 50% and responses received after the start of class will not be accepted.

Course Summary

Of the 14 sessions that comprise this course, the first three will discuss the historical changes in the social and legal constructions of disability and an overview of the impact Disability Studies and the disability rights movement has had on the law. The next class will focus on newborns and reasonable accommodations in health care, the next four classes will examine the k-12 and higher education settings with an emphasis on the federal system, barriers faced by students with disabilities, the development of their legal rights to access, application of current laws and the growing use of mediation in settling disputes. The next five classes will examine access to public accommodations, governmental services and programs, employment, fair housing and independent living. We will review for the final exam in the last class.
